About Me

At KdG I studied audio-video and soon found out I really wanted to focus on audio. I loved my Internship as an audio assistant for multicamera productions, but was also very interested in IoT and decided to study that after I graduated. Currently I'm in my third year at Thomas More. Luckily I'm able to combine school with a job as a freelance audio assistant. That way I can enjoy my two passions.

School

Elektronica-ICT
specification - Internet of Things/Digital Innovation
sep. 2020 – now
Thomas More, Geel

Multimedia and Communicatie Technologie
specification - keuzerichting Audio - Video
